CAREER OBJECTIVE

Motivated cybersecurity fresher with strong foundational knowledge in SOC operations, incident response, and web application security. Hands-on exposure to alert analysis, documentation, and basic web application penetration testing. Highly adaptable, detail-oriented, and eager to learn new security tools and procedures while contributing effectively to security operations.

TECHNICAL SKILLS

- Network Security & Security Fundamentals
- Incident Response & Alert Triage
- Threat Analysis & Log Monitoring
- Web Application Penetration Testing (Foundational)
- OWASP Top 10 Awareness
- SOC Processes & SOP Adherence
- Security Event Reporting
- Linux Fundamentals
- System Hardening & Password Management

PROJECTS

Web Application Security Testing (OWASP Top 10 – Practice Project)

- Performed basic web application security testing on intentionally vulnerable applications
- Identified common vulnerabilities such as SQL Injection, XSS, and authentication weaknesses
- Documented findings with potential impact and mitigation recommendations

SOC Alert Analysis & Incident Documentation (Simulated)

- Analyzed simulated SOC alerts to identify suspicious activity and false positives
- Gathered contextual data such as user behavior and system logs
- Documented incidents, severity, and response actions following SOPs

Linux System Hardening & Security Hygiene

- Implemented basic Linux hardening techniques including access control and password policies
- Reviewed system logs to detect unusual activity
- Practiced least-privilege and system update procedures

EDUCATION

Bachelor's Degree in Computer Science (2024)

Certifications / Learning

·Google Cybersecurity Certificate – In Progress

·Preparing for CompTIA Security+
